COATINGS

Your Guide to **CHOOSING COLOUR**
For Exterior Residential Powder Coating

Worth doing, worth Dulux®.

The Beauty Of Choosing Dulux Powder Coatings.

All of the colours shown in this guide have been chosen by Dulux for their exterior durability and fade resistance. Free of volatile solvents and toxic pigments, these superior products safeguard both your investment and the environment, available in a collection of solid, textured and pearlescent finishes.

Prepare for It

To maximise the life of your coating, Dulux recommend the application of a powder coating primer (below table). It should be applied in accordance with Australian Standard AS 3715-2002 for architectural aluminium and alloys, or AS 4506-2005 for other metal substrates.

SUBSTRATE	PRIMER COAT
Steel	Dulux Zincshield®
Zinc Coated Steel	Dulux E-Prime™
Hot Dipped Galvanized Steel	Dulux E-Prime™
Aluminium (Severe Environments & Sharp Edges)	Dulux E-Prime™

About our Products

DURALLOY® XT & FG

High durable polyesters are an ideal choice for architectural residential fittings such as aluminium windows, doors, balustrades and fences. They are equally suited to interior items and other metal substrates. In addition, **FG** is designed to provide a smooth film over porous substrates.

PRECIOUS® Pearls

For an added touch of class, **Precious® Pearls** offer all the benefits of **Duralloy XT**. Whilst providing a classy alternative to anodised finishes.

The performance of our Duralloy and Precious products exceed Australian Standard AS3715-2002 for architectural application of aluminium and aluminium alloys and AAMA2603-2002. Designed for residential developments equivalent to Class 1 or Class 10 of the Australian Building Code BCA 96, that are up to 3 floors from the ground and greater than 100 metres from saltwater.

POWDER COATINGS

Making it Last

The effects of ultra violet light, pollution, dirt, grime and salt, can all accumulate on your powder coated surface over time.

To extend the effective life of powder coatings and protect any warranty requirements that may exist, a very simple regular maintenance program should be implemented.

Cleaning should take place every six months, however, in coastal or industrial regions, cleaning should occur every three months.

To clean your powder coated surface:

1. *Carefully remove any loose deposits with a wet sponge.*
2. *Use a soft, non abrasive brush or cloth, and a mild household detergent solution to remove dust, salt and other deposits.*
3. *Rinse off with clean fresh water.*

Specifying exactly the right colour

Some colours, whether powder, paints or furnishings may share the same colour name but be entirely different. This is especially true of other powder suppliers who use Dulux® colour names for their products, however the colours rarely match. When choosing colours, remember to specify both the Dulux® colour code and name.

The Duralloy® range incorporates a range of colours designed to harmonise with pre-coated steel products such as Colorbond®. Powder Coatings will never identically match these pre-coated steel products when new, or over time, due to the different coating technologies.

Every effort has been made to present these colours as accurately as possible and as close as modern processes allow. Colour appearance may vary according to light source. Where colour accuracy is vital, a powder coated panel should be requested to confirm your selection. **Dulux Customer Service on 13 2499**
